

They
came
while
you
were

sleeping.

Soul-ravaged, nerves vibrating at a diabolic jiggle, skin raw and hot-wired to a hellish terror... the demons of withdrawal drag even the most determined into a hopeless well of unbearable suffering.

With Neuraad, the demons are here and gone in 24 hours. While you sleep.

Neuraad is rapid anesthesia assisted detoxification, a revolutionary pain-free, successful way to detox.

While under medication, you are taken through a controlled withdrawal that rids your body of opioids.

And an ongoing therapy and psychological program keeps it clear. Neuraad is performed by board certified physicians at the Providence St. Vincent Hospital pain center. They'll take your call 24-hours a day. Phone (503) 291-1543, or visit www.raad.com.

The only way to get through hell is with your eyes closed.

NEURAAD[™]
