

**Kill**  
the  
addict

**in  
you.**

You had a life once. You did what you wanted. Lived how you wanted to live. Had friends. A family.

Then this other person grew inside you. Started running your life. Taking your stuff. Now, it's all you live for. You have to keep it fed. Keep it off your back.

Kill it. There's not a junkie alive that doesn't want to. But it's part of you, and how do you kill it without killing yourself? Neuraad™ has a way. It's a pain-free detox. While you're sleeping, Neuraad takes you through opioid withdrawal.

It kills the addict, and gives you back your life.

And an ongoing therapy and psychological program keeps it dead. Neuraad is performed by board certified physicians at the Providence St. Vincent Hospital pain center. They'll take your call 24-hours a day. Phone (503) 291-1543, or visit [www.raad.com](http://www.raad.com).

The addict inside will someday kill you. That's not news. The news is that now you can get it first.

**NEURAAD™**
